

The Municipal Services Bill Charges effective February 1, 2015

The Milwaukee Municipal Services Bill includes nine charges for City of Milwaukee services and Milwaukee Metropolitan Sewerage District (MMSD) services. The city's drinking water utility billing system manages the billing and forwards the collected charges to the City Treasurer for distribution to other city departments and the MMSD. The charges are outlined here in the order in which they appear on the Municipal Services Bill. Residential and smaller commercial customers are billed quarterly; larger commercial accounts are billed monthly.

Milwaukee Water Works -- Water Charges

The Milwaukee Water Works provides drinking water service and billing for Milwaukee, Greenfield, Hales Corners, St. Francis, and West Milwaukee. Water charges for these retail service communities are shown below.

We sell water service at a wholesale rate to utilities in Brown Deer, Butler, Greendale, Menomonee Falls, Mequon, New Berlin, Shorewood, Thiensville, Wauwatosa, West Allis, and the Milwaukee County Grounds. These communities operate their own water utilities and bill their customers. Please contact municipal offices in these communities for water charges.

Water Service Charge This is a fixed charge based on the size of the water meter. The charge pays for installation, repair, maintenance, and reading of water meters; billing and customer service. The Public Fire Protection Charge covers the cost of installing water mains to handle fire flow demands, as well as the maintenance expense of fire hydrants.

Residential and some smaller commercial customers are billed quarterly. Meters in the size range of 1" to 12" are typically used in commercial and industrial applications.

Water Usage Charge This charge is based on the volume of water used. It pays for operation and improvement of water purification and pumping facilities.

Water meters measure usage in units called Ccf, which stands for 100 cubic feet. One Ccf of water equals 748 gallons of water. To calculate water usage in gallons, multiply the number of Ccf by 748. The typical person in Milwaukee uses 10 Ccf of water per quarter. Multiply 10 by the number of people in your household to give you the number of Ccf of water used in one quarter (for example, 4 people x 10 = 40 Ccf). If you are using much more than 10 Ccf per person per quarter, you may have water leaks.

The Milwaukee Water Works offers commercial and industrial customers a declining block rate in which the charge per volume of water decreases as water usage increases. The declining block is appropriate where there is ample water supply and treatment capacity. Water used is returned to Lake Michigan.

Water charges were determined and authorized by the Public Service Commission of Wisconsin (PSC), Docket 3720-WR-108, effective November 1, 2014. Water rates are intended to ensure the financial stability of the utility and fair value for customers.

Milwaukee Metropolitan Sewerage District (MMSD)

Sewer Treatment Charges

These charges were authorized by the MMSD Board of Commissioners, effective Feb. 1, 2015. The Milwaukee Water Works bills for them on behalf of the MMSD for treating wastewater.

MMSD Sewer Treatment Service Charge This charge is a fixed charge based on the size of the water meter.

The residential service charge for a water meter sized 5/8" or 3/4" is **\$14.76 per quarter**.

The commercial service charge is based on the size of the water meter:

Meter Size	Service Charge Per Quarter	Service Charge Per Month
¾ inch or smaller	\$18.86	\$6.29
1 inch to 1-¼ inch	\$25.04	\$8.35
1-½ inch	\$34.31	\$11.44
2-inch	\$44.61	\$14.87
3-inch	\$77.06	\$25.69
4-inch	\$141.43	\$47.14
6-inch	\$238.25	\$79.42
8-inch	\$358.25	\$119.42
10-inch	\$528.71	\$176.24
12-inch	\$787.24	\$262.41

MMSD Sewer Treatment Usage Charge The charge is **\$1.37 per Ccf of water used**.

The residential charge is based on the water used during the first quarter of the year. This is called "winter usage." If, in any of the three quarters remaining in the year, your water use is less than "winter usage," we will calculate that quarterly charge based on the lower actual water usage or 21 Ccf.

The commercial charge is calculated using actual water use each billing period. Commercial customers who use a large quantity of water but do not discharge all of it to the sewerage system may be certified by MMSD for a discounted charge. Call MMSD at (414) 272-5100.

City of Milwaukee Municipal Service Charges

Charges for Storm Water, Solid Waste, and Snow and Ice Removal continue to be billed to a property even after water service is turned off at the curb. Depending on when the water was turned off, water and sewer charges may appear on the first bill after the turn-off.

Local Sewerage Charge

This charge is based on the amount of water used in the billing period. The charge is **\$1.38 per Ccf of water used**. The charge is used to pay for maintaining city sanitary sewers that carry waste to the MMSD.

The **residential charge** is calculated like the MMSD Sewer Treatment Usage Charge, based on the winter quarter water usage.

The **commercial charge** is based on the water usage each billing period. Commercial customers who use a large quantity of water but do not discharge all of it to the sewerage system may be certified by MMSD for a discounted charge. Call MMSD at (414) 272-5100.

Note for West Milwaukee Customers: The Village of West Milwaukee Board determines the sewer rates. The Milwaukee Water Works provides a sewer billing service to West Milwaukee. For questions about the West Milwaukee sewer rate, please call West Milwaukee Department of Public Works, (414) 645-6238.

Storm Water Management Charge

This charge for maintenance of storm sewers is based on the amount of hard surface area of a property. A typical residential property has an average hard surface area of 1,610 square feet. This amount is called an Equivalent Residential Unit (ERU). One ERU=1,610 sq. ft. **A residential property is charged one ERU. A non-residential property is charged based on the square footage of hard surface of the property.**

Vacant property with sewer and water service and street access, with or without a building on it, and with any hard surface such as a driveway, sidewalk, or concrete slab, will be charged. A lot that has no impervious surface (no building, no driveway) will not be charged.

Residential buildings (one to four dwelling units in a house, apartment, or condominium) are charged **\$17.96 per quarter** or **\$71.84 per year**.

Non-residential property

For commercial customers **billed quarterly**, the charge is **\$17.96 per ERU per quarter**.

For commercial customers **billed monthly**, the charge is **\$5.99 per ERU per month**.

Calculate the number of ERUs for a property by dividing the square footage of hard surface of the property by 1,610.

Condominium associations are charged based on the amount of hard surface area of the entire property. The charge is billed quarterly to the condominium association.

Solid Waste Charge This charge partially pays for garbage collection. Collection costs also are partially financed by the City of Milwaukee property tax. The charge is **\$48.60 per quarter** per residential unit for one-, two-, three- and four-family dwelling units, including vacant units. As applicable to non-residential property, the charge is \$48.60 per cubic yard.

Extra Garbage Cart Charge This charge is issued for each extra garbage cart you use beyond one cart. This applies to more than one garbage cart per unit for one-, two-, three-, and four-family dwelling units. The charge is **\$15.00 per quarter per cart**. There is no charge for extra recycling carts. To request removal of extra garbage carts or to request an additional recycling cart, please call (414) 286-CITY (286-2489).

Snow and Ice Removal Charge This charge partially offsets the costs of plowing and salting streets. Customers billed quarterly see the charge on the fourth quarter bill and commercial customers billed monthly see the charge on the October bill. The charge is **\$0.9155 per foot of street frontage of the property**. For **residential property with multiple street frontages** such as a corner lot, the shortest frontage is used to calculate the charge. For **non-residential property**, including tax-exempt property, the total street frontage is used to calculate the charge.
